Function Assessment Staging (FAST) for Alzheimer’s/Dementia

1. No difficulty either subjectively or objectively

2. Complains of forgetting location of objectives
   Subjective work difficulties*

3. Decreased job functioning evident to co-workers
   Difficulty in traveling to new locations
   Decreased organization capacity*

4. Decreased ability to perform complex tasks such as:
   · Planning dinner for guests
   · Handling personal finances (e.g. forgetting to pay bills)
   · Difficulty shopping, etc.

5. Requires assistance in choosing proper clothing to wear for the day, season or occasion*
   Repeatedly observed wearing the same clothing, unless supervised

6. Improperly putting on clothes without assistance or cueing* (e.g. may put street clothes on over night clothes, put shoes on wrong feet, have difficulty buttoning clothing)
   Unable to bathe properly (e.g. difficulty adjusting bath water temperature)*
   Unable to handle mechanics of toileting (e.g. forgets to flush the toilet, does not wipe properly or properly dispose of toilet tissue)*
   Urinary incontinence*
   Fecal incontinence

7. Limited ability to speak more than 6 intelligible different words in an average day or interview*
   Speech ability is limited to the use of a single intelligible word in a normal interaction*
   Repetitive actions*
   Ambulatory ability is lost (cannot walk without personal assistance)
   Cannot sit up without assistance*
   Individual falls over if no lateral arm rests on chair*
   Loss of ability to smile*
   Loss of ability to hold up head independently*

Typically hospice is appropriate if FAST score is 6 or 7, however, a patient does not need to meet all criteria in order to be hospice appropriate, and may have additional clinical needs that would also qualify them for hospice care. A Cedar Hospice nurse would be able to meet with the patient to determine their eligibility.
